

Parkland County, Alberta

- CLiCK / Discover Parkland

Forte Consulting developed a pair of complementary web mapping applications for Parkland County, Alberta. The internally facing application, CLiCK, is tailored to the needs of County staff and provides access to a broad range of business data including assessment and financial system information that is linked to properties. The public facing application, Discover Parkland, is designed to support the needs of the public, including residents and visitors to Parkland County. Discover Parkland allows users to retrieve information about County services as well as a variety of businesses, recreational amenities and experiences within Parkland County.

These applications have become key components of the County's day to day workflows and interaction with the public. Forte continues to provide periodic functional enhancements and ongoing support and maintenance for both applications.

The Discover Parkland application may be accessed at:

BUSINESS SOLUTION HIGHLIGHTS

- Provides a simple, "one stop" map-based access point to a broad range of business data from various County departments including Engineering, Planning, Assessment, Finance and Public Works.
- Presents different types of data / data detail depending on the user (e.g. internal County staff users vs. the public).
- Accessible from several browser platforms and devices, including desktop, tablet and handheld devices with consistent functionality, user interface and data content.

TECHNOLOGY SOLUTION HIGHLIGHTS

CLiCK and Discover Parkland utilize the following technology components:

- Esri ArcGIS for Server
- Esri ArcSDE
- Geocortex Essentials (HTML5 viewer)
- Microsoft SQL Server
